Product Name :	Product Code :
Table Top Electro Pneumatic Coder	EQUP-MC20087-0029

Description :

Table Top Electro Pneumatic Coder

Technical Specification :

Capacity   20 per minute
Print Speed   Motorised
Type   Table Top

Table Top Electro Pneumatic Coder which has outstanding capacity and precise functionality. These coders are extensively used to code intermittent packaging machines and retaining their salient information. In order to perform timed operation, these are attached to sensors, switches etc. Finally, these coders are available in tow .

Features:

- Electro-pneumatic cylinder based very compact design. Can be very easily installed on existing packaging machinery with bracket supplied suitable for all machine models
- Low cost machine with very low operating and inventory costs. Uses standard grooved or flat stereos and fast drying coding ink
- Can be connected to any sensor, limit switch, etc. for online controlled operation or to timer for automatic timed operation
- Imported pneumatic accessories provide reliability, long life and speeds upto 150 impressions per minute

Supply Voltage	230 Vac ± 10%, 10 VA
Printing Area	4 to 6 lines (35 X 35 mm)
Printing Speed	Max. 150 imprints / min.
Prints using	Easily Changeable grooved / flat, rubber / nylon stereos
Inking Medium	Special rechargeable ink / wax cartridge / ink paste
Printing Medium	Quick drying liquid ink (Black, Red, White*, Golden*, etc.)
Impressions	15,000 per 20 ml. charge

Weight	6 Kgs, 2 Kgs (Only head)
