

Product Name :
Army Military Wire And Cable Detector

Product Code :
EQUP-MC20008-0011

Description :

Army Military Wire And Cable Detector

Technical Specification :

- Road, terrain and various objects inspection for IED control wire line concealed in the ground
- Current underground line pass definition
- Subversive and terrorist appliances search and defusing Road and terrain combat engineering reconnaissance
- Mass public actions anti-terrorist and security support
- Security system cable lines service and maintenance

ADVANTAGES

- The device is intended for field operations
- Not very extended wire-line detection (RC IED cables: from 20m and longer)
- User-friendly design, the tool can be
- easily fitted to operator's height surface relief and the height of vegetation
- Two operational modes:
 - (1) unknown wire line detection
 - (2) the revealed line tracing
- Audible indication
- LED indication:
- Signal level in wire line searching mode
- Actual deflection from the detected-line trace indication.
- Power-source state LED indication together with continuous voltage control.
