

Product Name :
Preset Click-Type Torque Wrench

Product Code :
EQUP-MC20033-0003

Description :

Preset Click-Type Torque Wrench

Technical Specification :

All parts are made of alloy steel for maximum life and calibration retention.
Square drives meet industrial requirements and government specifications.
Torques in both left and right hand directions.
Accuracy: $\pm 3\%$ CW $\pm 4\%$ CCW of indicated value.
Automatic re-set when force on handle is released.
Torque limiting positive sensory "click" when pre-set.
Smooth knurled steel hand hold for comfortable, safe grip.
Handle length proportioned to torque range of wrench for minimum user fatigue.
Tamper proof torque setting for production line use.
Torque values can be calibrated in English and Metric settings.
