

Product Name :
Allen Key (Tip Size 5 mm)

Product Code :
EQUP-MC20024-0008

Description :

Allen Key (Tip Size 5 mm)

Technical Specification :

Made from expensive high grade alloy steel

Accurately hardened and tempered to withstand higher torque and enable high wear resistance

Black Allen keys are made from Chrome Vanadium Steel which withstand upto 30% higher torque as compared to Allen keys made Carbon Steel

Allen Keys are scientifically hardened to 52 to 56 HRC

Other makes Allen keys are usually offered with hardness in the range of 48 to 52 HRC

As a result of higher hardness offered in case of Black Allen keys along with superior steel properties the wear resistance and life is more of Allen keys
