

Product Name :
Multifunctional Audio Video Detector

Product Code :
EQUP-MC20281-0008

Description :

Multifunctional Audio Video Detector

Technical Specification :

The Audio video detector can help rescuer find those who are trapped under ruins and communicate with them. Equipped with an infrared camera, it can work under the environment without light. The host has wireless transmission function, which can be transmitted through WIFI or mobile data

Display: 7" colour screen

Power: Rechargeable lithium batteries(>6 h)

Probe

360-degree rotation probe: 8 infrared lights

Max diameter of probe: 42mm

Built-in microphone and loudspeaker

Definition: 720 lines

Night visual range: over 6m

The probe can be rotated 360 degrees horizontally and flipped 180 degrees by pressing the button.

Infrared visual probe: 8 infrared lights

Max diameter of probe: 34mm

Definition: 540 lines,

Protection grade of IP67

Night visual range: over 6m

Snake eye probe: Max diameter of probe: 10mm

Length of cable: 5m

4 built-in LED lights

Waterproof probe

Underwater 360-degree probe: 12 highlight LED lights

Protection grade of IP68

Submarine cable 20m standard (30m, 50m optional)

The resolution is up to 1080P

Max. waterproof depth: 50m
