

Product Name :
Stereo Listening Through Wall System

Product Code :
EQUP-MC20284-0010

Description :

Stereo Listening Through Wall System

Technical Specification :

This multi-function stereo listening through wall device is the most updated one in similar products nowadays, which can give listener the clearest audio information they are going to know. This is a special amplifier that will pick up the slightest noise through solid objects like a wall, so you can listen to what is happening on the other side. The contact microphone is a ceramic pin specially developed for converting vibration into audible noise. It has two powerful transducers together comprise an exceptional monitoring device. It is widely used in police, prison and intelligence department.

Dimension: MCU(main control unit): 131×125×42mm; 41×18×15mm

Total Weight: 956g

Power Supply: Built-in 9V battery

Battery Working Time: 5 hours without recording; 4 hours with recording
