

Product Name :
Explosive Ordnance Disposal Water jet Disrupter

Product Code :
EQUP-MC20282-0034

Description :

Explosive Ordnance Disposal Water jet Disrupter

Technical Specification :

The Water Jet Explosive Devices Disrupter is an equipment used for disruption of Improvised Explosive Devices with a high probability of avoiding detonation or explosion. It is composed of barrel, buffer, laser sight, nozzle, projectiles, tripod, cables, etc. The device is especially designed for EOD and IED persons. The disrupter comprises a specially designed liquid container. A high pressure nuzzle is available to generate a very high velocity jet of cool liquid in case of handling with high duty IED. The provided laser light allows to accurate aiming. The tripod with ratchet wheel stop mechanism guarantees that the disrupter will not move backwards or tumble when shooting. The specially designed legs can be adjusted to correct working position and angle. Four different bullets are available: water, spading, organic glass, punching bullet.

Weight (Main Unit): 21 kg

Package Dimension?Main Unit?: 64x28x52 cm

Package Dimension ?Accessory box?: 56x22x46 cm

Total Weight: 45 kg

Detonate Power Supply: 3-9V/1A

Battery: 9V

Caliber: 38mm
