

Product Name :
Hidden Camera Finder

Product Code :
EQUP-MC20284-0021

Description :

Hidden Camera Finder

Technical Specification :

The Hidden Camera Finder is the most reliable and easy to use technology on the market for finding hidden cameras. Its function is based on the principle of optical augmentation. This technical jargon refers to the phenomenon where light reflected from a focused optical system such as a video camera is reflected along the same path as the incident light. This means that if a hidden camera is illuminated and viewed with the Camera Finder technology then a strong reflection from the target camera will reveal its position to the user. The Camera Finder exploits this phenomenon by using a ring of ultra-bright LEDs arranged around a viewing port. When a user scans a room looking through the viewing port a hidden camera appearing in the field of view will brightly reflect the light from the LEDs.

Power Supply: Four AAA batteries

Operate Lamp-house: Red laser

Wave Length: 920nm

Multiple Eyesight Lens: 3 times optical glass

Dimension (mm): 105(L) × 40(W) × 55(H)

Weight: 152g

Consume Current: 80 mAh
