

Product Name :
The Double-Door Steaming Cabinet With A Viewing Window

Product Code :
MM-CHINA11001-004

Description :

The Double-Door Steaming Cabinet With A Viewing Window

Technical Specification :

5th-Generation Induction Heating + German Imported IGBT Modules

Equipped with advanced 5th-gen electromagnetic heating technology and original German IGBT power modules, ensuring higher efficiency, stable performance, and extended service life — perfect for continuous high-load operation.

High-Density Pure Copper Magnetic Coil – Instant High Heat, Faster Cooking

Precision-wound pure copper coil with strong magnetic concentration delivers up to 95% thermal efficiency, providing flame-like power for stir-frying, boiling, and searing — significantly improving kitchen throughput.

Fully Modular Circuit Control System – Stable & Easy to Maintain

Modular design enhances system reliability, reduces failure rates, and simplifies maintenance — minimizing downtime and repair costs.

Stainless Steel Body + Triple Radiation Shielding – Safe & Healthy

Premium 304 stainless steel housing ensures durability. With triple electromagnetic shielding, radiation is effectively blocked, protecting chefs' health and meeting international safety standards.

Seamless One-Piece Ceramic Glass Panel – No Gaps, No Residue

Smooth, seamless surface prevents food debris and oil from getting trapped. Easy to clean — just wipe or rinse — maintaining hygiene and saving cleaning time.

8-Stage Magnetic Control Knob – Simple & Intuitive Operation

User-friendly 8-level power adjustment with responsive magnetic dials. No training required — staff can operate it instantly, reducing onboarding time.

Removable Rear Panel – Saves Shipping & Storage Costs

Innovative detachable back design reduces packaging size, cutting down on freight and warehousing expenses — ideal for bulk orders and global distribution.

All-Electric Cooking – Zero Flame, Zero Emissions

No open flame, no gas, no harmful fumes like CO or smoke. Eliminates health risks from gas inhalation and meets strict environmental and safety regulations.

Ultra-Quiet Operation – Peaceful Cooking Environment

Optimized cooling system reduces noise to as low as 45dB, creating a quiet, comfortable kitchen atmosphere — perfect for open kitchens and indoor food courts.

Smart Microcomputer Control – Comprehensive Safety Protection

Built-in intelligent chip offers auto-alert, pan detection, overheat protection, over-voltage/under-voltage protection, and phase-loss protection — ensuring safe, worry-free operation.

3-in-1 Protective Housing – Dustproof, Waterproof, Oil-Resistant

Sealed structure prevents pests, moisture, and grease from entering the unit, extending lifespan and reducing maintenance issues.

Customizable by Factory – Tailored to Your Needs

OEM/ODM supported. Available in various power levels (3kW to 20kW), sizes (countertop or built-in), and voltages (220V/380V) — ideal for diverse kitchen layouts and global markets.
