

Product Name :
Double-Door Steaming Cabinet with Viewing Window

Product Code :
MM-CHINA11001-006

Description :

Double-Door Steaming Cabinet with Viewing Window

Technical Specification :

Steaming is one of the healthiest cooking methods, preserving the natural nutrients and flavors of food. The Steaming Cabinet Series offers a wide range of models with thoughtful designs. Featuring integrated insulation foaming, high-efficiency electric heating elements, and fast heating performance, they deliver excellent energy savings and meet various customer needs. Ideal for steaming mantou (steamed buns), rice, dim sum, and seafood, it is a top choice for quality-conscious users.

Induction Cooker Series Overview

Our product line covers a complete range of commercial induction cooking solutions:

Commercial Wok Cookers

Including large and small wok ranges, suitable for stir-frying in restaurants, hotels, and institutional kitchens.

Commercial Soup Cookers

High-stand and low-stand soup boilers designed for long-hour simmering and stewing.

Tabletop Induction Cookers

220V/3.5kW to 5kW concave or flat tabletop models, ideal for meal preparation for up to 50 people.

Commercial Steaming Cabinets

Seafood steamers, rice steamers, and custom steamers for various food applications like dim sum and traditional cuisine.

Product Features

Advanced 5th Generation Induction Heating Technology

Powered by high-performance German-imported IGBT modules, ensuring consistent and reliable operation.

Premium All-Copper Concentrated Magnetic Coils

Delivers ultra-powerful heating performance for faster cooking output.

Fully Modular Circuit Control System

Enhances performance and operational stability.

Durable Stainless Steel Exterior

Features triple anti-radiation protection, safeguarding chef health during extended use.

Seamless One-Piece Panel Design

No crevices, no residue buildup, making cleaning easy and hygienic.

8-Level Magnetic Dial Control

Intuitive and simple operation, even for first-time users.

Detachable Back Panel

Humanized design for easier maintenance and reduced shipping costs.

All-Electric Operation

No open flame, zero harmful emissions, ensuring a safe cooking environment.

Ultra-Quiet Design

Creates a clean, calm, and comfortable kitchen workspace.

Smart Microcomputer Control System

Includes auto-alarm, pot detection, overheat protection, and voltage anomaly protection (over/under voltage and phase loss).

Triple Protection Housing Design

Resistant to insects, water, and grease for added durability in commercial kitchens.
