

Product Name :
Fish Slicer Machine

Product Code :
MM-CHINA11002-002

Description :

Fish Slicer Machine

Technical Specification :

High Precision Slicing

Adjustable cutting thickness 1.8–10 mm, customizable upon request.
Slice angle options: 25°, 30°, 35°, 40°, 45° for different presentation styles.
Stainless steel blades ensure clean cuts without damaging the texture of the fish.
Uniform slices for better product appearance and cooking consistency.

Increased Efficiency & Output

Continuous feeding system for non-stop production.
Significantly reduces manual labor while doubling or tripling production capacity.
Perfect for both small-scale and large-scale seafood processing facilities.

Food-Grade & Hygienic Design

Built with SUS304 stainless steel for durability and easy cleaning.
Compliant with HACCP, ISO22000, and GMP standards.
Detachable components for quick sanitation and prevention of contamination.

Customizable Solutions

Can be integrated into a fully automated fish processing line.
Optional modules include:
Automatic feeding conveyor
Weight grading system

Bone removing unit
Connection to vacuum packaging system

Multi-Functional Performance
Supports slicing of multiple products beyond fish:
Meat, beef tripe, pork, beef tendons, and more.
Suitable for restaurants, frozen food plants, and seafood factories.
