

Product Name :
Heavy Duty Commercial Meat Grinder

Product Code :
MM-CHINA11002-003

Description :

Heavy Duty Commercial Meat Grinder

Technical Specification :

Our Heavy Duty Commercial Meat Grinder is specifically designed for high-demand, high-output commercial environments, ensuring exceptional performance and durability even under continuous use. Whether you operate a large meat processing plant, restaurant, or supermarket, this heavy-duty grinder provides outstanding processing capacity, helping you efficiently handle large volumes of meat. With its powerful motor, robust stainless steel body, and efficient cutting system, it can tackle the most demanding tasks, making it an essential tool for any commercial kitchen or meat processing facility.

Key Features

Powerful Motor

Equipped with a 2 HP motor, this meat grinder is capable of handling large amounts of meat in a short time, ensuring that your production line remains efficient and runs smoothly. The powerful motor can withstand long hours of operation, making it ideal for high-demand environments. Whether grinding beef, pork, or mixed meats, it maintains consistent performance and avoids overheating or performance degradation.

High Output Capacity

Designed for high output, this meat grinder can process up to 500 kg of meat per hour, making it perfect for large-scale commercial operations. Whether it's for everyday production or urgent bulk processing, this machine quickly gets the job done, reducing wait times and increasing overall productivity.
