

Product Name :
Sausage Stuffer Machine

Product Code :
MM-CHINA11002-005

Description :

Sausage Stuffer Machine

Technical Specification :

The Sausage Stuffer Machine is an automatic sausage filler designed for home kitchens, restaurants, and food processing businesses.

Combining food-grade materials and smart technology , this machine delivers a hygienic and efficient solution for meat processing. Whether making traditional sausages, meatballs, or plant-based products, the machine ensures precise stuffing with minimal effort.

Core Features & Benefits

High-Efficiency Filling Technology

High-Capacity Output : Processes up to 10kg per minute , enabling continuous operation for large-scale production.

Precision Control : Adjustable pressure systems ensure uniform density, preventing breaks or air pockets.

Multi-Sized Compatibility : Supports various casing diameters (20mm–50mm) for diverse sausage types.

Food Safety & User-Friendly Design

Durable Construction : Built with 304 stainless steel , resistant to corrosion and easy to clean, meeting FDA standards .

Intuitive Operation : Touchscreen controls simplify setup, requiring minimal training.

Quick-Dismantle Design : Easy-to-clean components reduce bacterial risks, adhering to HACCP guidelines .

Versatility & Expandability

Multi-Use Applications : Ideal for home sausage-making , restaurant bulk production , or small-scale food factories.

Accessory Compatibility : Integrates with meat grinders, smokers , and other equipment for a full meat-processing workflow.
