

Product Name :
Heavy Duty Meat Slicer Machine

Product Code :
MM-CHINA11002-006

Description :

Heavy Duty Meat Slicer Machine

Technical Specification :

The Heavy Duty Meat Slicer Machine is an industrial-grade slicing solution designed for high-volume commercial operations. Engineered to deliver precision, durability, and efficiency, it effortlessly handles fresh meats, cured ham, cheese, frozen products, and more.

Ideal for businesses prioritizing productivity and consistency, this machine reduces labor costs while ensuring restaurant-quality cuts for every application.

Key Features

Industrial-Grade Performance

High-Torque Motor: 1500W-3000W motor options for continuous 8-12 hour operation, even with thick or frozen cuts.

Robust Construction: Commercial kitchens use anodized aluminum-magnesium alloy for its light weight, strength, and corrosion resistance—ideal for clean, agile setups. Industrial processing relies on stainless steel for its durability under harsh, high-demand conditions.

Precision Cutting & Flexibility

Digital Control Panel: Adjust thickness from 0.1mm to 30mm (stepless adjustment) for sushi-grade slices or thick cuts for grilling.

Laser-Aligned Blades: Food-grade stainless steel blades (300-400mm diameter) with ± 0.2 mm slicing accuracy for uniform results.

Safety & Efficiency

Dual Safety Systems: Emergency stop button + blade guard, compliant with CE/UL/FDA standards.
Automatic Feeding System: Adjustable speed (10-30 slices/min) boosts output to 500kg+ daily, minimizing manual handling.

Hygienic & Easy Maintenance

Modular Design: Quick-disassembly blades, trays, and guides for thorough cleaning (HACCP-certified).

Self-Lubricating Parts: Reduces downtime and maintenance costs.

Versatility & Customization

Multi-Product Compatibility: Slice meats, vegetables, bread, and smoked products with one machine.

Custom Options: Choose blade types (straight/serrated), workspace size, voltage (220V/380V), and more.

Motor Power: 1500W/2200W/3000W (Optional)

Thickness Range: 0.1mm–30mm (Digital Control)

Max. Cutting Width: 350mm

Blade Material/Size: Stainless Steel/300-400mm

Worktable Capacity: 15-30kg (Model-Dependent)

Power Supply: 220V/380V, 50/60Hz
