

Product Name :
Automatic Meat Slicer Machine

Product Code :
MM-CHINA11002-007

Description :

Automatic Meat Slicer Machine

Technical Specification :

The Automatic Meat Slicer Machine is a high-efficiency, precision cutting device designed for use in restaurants, supermarkets, and food processing plants.

It quickly slices various types of meat, including fresh meat, frozen meat, bacon, steak, and ham, ensuring uniform thickness, improving production efficiency, and reducing labor costs.

Key Features

High-Efficiency and Precision Cutting

Equipped with high-precision stainless steel blades that are sharp and durable for consistent slicing.

Adjustable slice thickness (range: 0.5mm-30mm) to meet diverse food processing needs.

High-speed motor operation ensures stable slicing performance and increased productivity.

Intelligent Automation for Easy Operation

User-friendly touchscreen control system with multiple slicing modes.

One-touch automatic slicing minimizes manual intervention and enhances safety.

Built-in counter for precise control of slicing quantity, aiding in production management.

Powerful and Durable Motor System

Available with high-power motors (750W-1500W) to support continuous operation in demanding environments.

High-torque transmission system ensures smooth slicing without jamming or meat sticking.

Advanced Safety Protection Design

Equipped with a protective safety cover to prevent accidental injuries.
Emergency stop button allows immediate shutdown in case of anomalies.
Anti-slip base design enhances machine stability and reduces vibration.

Food-Grade Material and Easy-to-Clean Design

Built with 304 food-grade stainless steel, corrosion-resistant and rust-proof, meeting food safety standards.
Detachable blade and conveyor components for easy cleaning and hygiene maintenance.
