

Product Name :
Remove The Machine

Product Code :
MM-CHINA11002-0020

Description :

Remove The Machine

Technical Specification :

The machine features a simple structure, easy operation, and robust mechanisms that minimize susceptibility to damage.

It offers high efficiency and rapid processing speeds, delivering greater investment value compared to traditional sausage knotting and manual threading machines.

With substantial processing capacity, a single operator can manage a thread stripping machine, achieving a daily output of 8 to 10 tons on average.

This significantly reduces labor intensity and cuts down on human resource costs.

Compact in size, the machine requires minimal space and can be easily relocated as needed.

It utilizes a standard reducer motor and SUS304 stainless steel construction, ensuring safety, hygiene, and guaranteed quality.
