

Product Name :
Electric Cooked Meat Slicer

Product Code :
MM-CHINA11002-0021

Description :

Electric Cooked Meat Slicer

Technical Specification :

Heavy-Duty Commercial Electric Cooked Meat Slicer

licing cooked and thermal-processed proteins presents an immediate challenge: the tenderized cellular structure is incredibly prone to crumbling, tearing, and aggressive fat smearing when exposed to friction. Engineered for high-output central kitchens, catering facilities, and medium-scale food factories, our heavy-duty electric cooked meat slicer eliminates product deformation. By pairing a massive 320mm rotating circular blade with a precisely calibrated, frictionless carriage system, this machine effortlessly produces sheer, intact slices, locking in the premium visual appeal and structural integrity of your finished roasts, hams, and bacon.

Absolute Slice Uniformity: The reinforced index mechanism strictly dictates slice thickness from 1mm up to 14mm, entirely preventing rigid "wedging" or uneven bottom cuts.

High-Capacity Batching: The extended meat carriage confidently supports a maximum loading of 15KG per time, minimizing operator reloading frequency during heavy shifts.

Optimized Power Draw: The 900/600W primary drive system ensures the blade maintains aggressive torque without stalling, even when cutting through dense meat crusts.
