

Product Name :
X-Type Cutting And Stringing Machine

Product Code :
MM-CHINA11002-0022

Description :

X-Type Cutting And Stringing Machine

Technical Specification :

The X-Type Cutting and Stringing Machine represents a leap forward in precision and efficiency for food processing operations.

This innovative machine is meticulously engineered to deliver accurate cuts and consistent stringing, streamlining production processes and enhancing product quality.

Designed with versatility in mind, the X-Type accommodates a wide range of food products, making it an ideal solution for manufacturers seeking to diversify their offerings. Its user-friendly interface and robust construction ensure ease of operation and long-lasting performance.

By investing in the X-Type Cutting and Stringing Machine, businesses can optimize their production capabilities and elevate their products to new heights of excellence.

Specifications: cutting, stringing one machine:

Voltage: 220v

Power: 2 kw

Efficiency: 10000 strings/hour

Machine size: 6500mm*1100mm*1400mm

Machine material: 304 stainless steel (national standard) food grade plastic

Machine weight: 580 kg

Power of the whole machine: combination of electric and pneumatic

Motor: Servo motor

Leakage protection: Yes

People needed:1-2 people
The machine to achieve cutting and string twofunctions;
Realize automatic sign-up

MachinesManufacturer China
