

Product Name :
Membrane Skinner

Product Code :
MM-CHINA11002-0028

Description :

Membrane Skinner

Technical Specification :

Industrial Membrane Skinner: Yield Maximization for High-Throughput Abattoirs

The Membrane Skinner is engineered specifically for large-scale meat processing facilities operating under continuous, high-moisture conditions. Addressing the critical industrial bottleneck of manual membrane removal, this unit provides sub-millimeter precision cutting that consistently limits meat loss to under 0.5 percent. Built around an IP65-rated washdown chassis, the system integrates directly into existing conveyor layouts to handle pork, beef, and veal cuts without structural modification overhead.

Achieves sustained throughput of up to 2000 kg/h depending on operator feed rate and cut dimensions.

Fabricated entirely from austenitic stainless steel with specialized SUS316L cutting blades.

Ergonomic operational height and dual pneumatic foot pedal configuration to minimize operator fatigue.

Rated Processing Capacity: 1500 - 2000 kg/h

Skinning Width: 500 mm

Motor Power Output: 1.1 KW (High-Torque Drive)

Blade Gap Adjustment Range: 0.1 mm - 3.0 mm (Micro-calibration)

Physical Dimensions: (L x W x H) 850 x 750 x 1050 mm

Construction Material: Frame / SUS316L Contact Parts

Required Compressed Air: 0.6 MPa
