

Product Name :
Gizzard Peeling Machine

Product Code :
MM-CHINA11002-0031

Description :

Gizzard Peeling Machine

Technical Specification :

The Gizzard Peeling Machine provides a highly efficient, compact stomach cleaning solution specifically developed for medium-scale slaughterhouses, specialized Halal butcheries, and regional poultry processing facilities. Unlike massive centralized evisceration line equipment that requires enormous floor space and continuous conveyor integration, this standalone unit is engineered for manual-feed precision.

It allows a single operator to safely and rapidly peel the tough yellow interior lining from pre-split chicken and duck gizzards, maintaining strict quality control and zero meat tearing on smaller batch processing runs.

Gizzard Peeling Machine Features

Easy to operate, convenient to clean and maintain

Beautiful appearance, excellent performance

Made of stainless steel, no pollution to products, comply with the food safety and hygiene standards

High efficiency, low energy consumption

High yield.
