

Product Name :
Fish Speed Cleaning Machine

Product Code :
MM-CHINA11002-0032

Description :

Fish Speed Cleaning Machine

Technical Specification :

Fish speed cleaning machine has a special designed water spraying sytem, which not only cleans the fish, but also helps the fish moving forward during the dissecting process.

Speed cleaning machine is controlled by PLC program and optoelectronic real-time system with Hybrid synergy Drive, takes use of vacuum tank to extract the fish internal organs .

Fish gutting machine is highly efficient. The capacity reaches 2400 fish per hour when the average weight is 1kg per fish.

The nobbing machine can smoothly dissect the fish's back in the middle.

The vacuum tank can extract 609% internal oraans, and the remainina organs and membrane will be cleaned by brush wheel. Aflast, the 99% internal organs can be cleaned, And the membrane removal rate can reach about 95%.
