

Product Name :
Big Chicken Feet Peeling Machine

Product Code :
MM-CHINA11002-0037

Description :

Big Chicken Feet Peeling Machine

Technical Specification :

The is a heavy-duty, continuous-feed chicken feet peeling machine engineered for medium-to-large abattoirs that have outgrown batch-type desktop peelers but do not require a fully integrated Turnkey production line. Processing 1200 to 1500 kg of pre-scalded chicken feet per hour through a single oversized peeling drum, this standalone industrial unit bridges the critical capacity gap. Facilities that already operate independent scalding tanks and chilling systems simply connect the CFP-1500 as the high-throughput core peeling node, immediately multiplying their output by five to eight times compared to smaller batch machines without redesigning their existing factory workflow.

Continuous gravity-fed intake hopper eliminates the stop-start inefficiency of batch loading cycles. Dual-motor architecture delivers independent drum rotation and disc spinning torque for aggressive cuticle stripping even on thick-skinned spent hen feet. Oversized 800 mm diameter peeling chamber accommodates surges in infeed volume without jamming or mechanical overload.

Continuous Throughput: 1200 - 1500 kg/h
Feed Method: Continuous Gravity Hopper
Peeling Drum Diameter: 800 mm
Drum Length: 1200 mm
Primary Motor (Drum Rotation): 3.0 KW / 3-Phase
Secondary Motor (Disc Spin): 2.2 KW / 3-Phase
Power Supply: 380V / 50Hz / 3-Phase

Peeling Elements: Reinforced Rubber Discs (Shore A 48)
Construction Material: (4mm Plate Thickness)
