

**Product Name :**  
Frozen Meat Cube Cutting Machine

**Product Code :**  
MM-CHINA11002-0064

### **Description :**

Frozen Meat Cube Cutting Machine

### **Technical Specification :**

This frozen meat cube cutting machine can directly cut all kinds of frozen meat from – 24 ° to – 18 ° without thawing, which can reduce the time of thawing and avoid the loss of nutrients in the whole meat during the process of slowing down. It is an indispensable meat cutting equipment in the processing of meat products. Widely used for cutting frozen pork, beef, mutton, boneless chicken, fish. Suitable for catering industry, unit canteen, food processing plant and other units.

#### Features of Frozen Meat Cube Dicer Machine

The complete machine is made of 304 stainless steel, the blade is made of alloy steel to avoid contamination. Frozen meat from -24°C to -18°C can be directly cut into cubes. It is the pre-procedure of the meat cutting and mixing machine and meat grinder process.

Wholly welded machine body stable and low noises.

Working with standard skip cars, no splash during slicing.

#### Technical Data of Frozen Meat Cutting Machine

Knife speed: 41times/min

Material slot width: 460/500mm

Transverse feed distance: 220mm

Power: 4kw

Capacity: 2-5t/h
