

Product Name :
High-Speed Twisting Machine

Product Code :
MM-CHINA11002-0073

Description :

High-Speed Twisting Machine

Technical Specification :

High speed kinking machine adopts programmable controller (PLC) as the core and frequency conversion motor as the power source.

The electric control adopts the fully enclosed control system, which can be operated in a variety of programming states, easy to adjust, high degree of automation, accurate action, stepless speed adjustable, is the automation technology, computer technology, communication technology integration of new industrial automation equipment. It has the characteristics of flexible programming, complete functions, high efficiency and simple operation. Each side door of the kinking machine has a waterproof structure, which is safe and easy to use and maintain.

The key parts of the kinking machine are machined by machining center, which ensures the accuracy of curve and motion. And the core components after careful processing, so that its high finish and good wear resistance. All guide parts are made of high quality copper alloy and high quality stainless steel with good mechanical properties and corrosion resistance.

The kinking machine can be connected with all kinds of continuous and stable filling machines to form an automatic production line.

The twist machine is equipped with three kinds of twist tubes of 9.5, 11.5 and 13.5, and the corresponding casings are selected.

The kink length can be adjusted flexibly and the kink speed can be changed steplessly. According to the user needs, can choose the appropriate configuration, can produce a variety of lengths of

productsThe length available is 3cm, 4cm, 5cm, 6cm, 7m, 8cm, 9cm, 10cm, 11cm,12cm 13cm, 14cm, 15cm,16cm,17cm, 19cm, 20cm, etc.(the default configuration is 4cm, 8cm,12cm).

Center height: 1000mm adjustable

Speed: 1500p/min

Power: 380v/50hz

Voltage: 380v/50hz

Pressure: 0.5mpa

Kink Tube: 9.5??11.5??13.5

Applicable Casing: PA 25-45mm?Collagen16-26

Packing Material: PA?Compress?Collagen
