

Product Name :
Hydraulic Sausage Stuffer

Product Code :
MM-CHINA11002-0074

Description :

Hydraulic Sausage Stuffer

Technical Specification :

The main parts are made of 304 high quality stainless steel, reliable and durable, easy to clean, in line with the food safety requirements.

Advanced technology, stable performance, easy operation, easy maintenance. Adopt the piston hydraulic drive, adjust the working pressure under the action of the hydraulic cylinder, so that the material range in the cylinder is wider, especially for the dry material filling relative to other enema machine

efficiency is more.

High degree of automation, save time and effort.

Special treatment of key parts, durable wear, control parts are imported components.

The appearance is treated by advanced surface technology, beautiful and generous, compact structure. convenient operation and convenient maintenance.

Equipped with safety protection device, it is the ideal equipment for meat processing.

With fast discharging speed and even intestine body, it can fill the intestine of meat block or chyme, it is flexible and convenient, free feeding, high efficiency, and has a good continuous production capacity convenient cleaning. suitable for various types of production enterprises.

Hydraulic enema machine is more powerful than pneumatic enema machine, can easily fill meat sausage.

Filling a variety of sausage such as Taiwan sausage, Qinqin sausage, Harbin red sausage, fish sausage, etc..
