

Product Name :
Frozen Meat Grinder

Product Code :
MM-CHINA11002-0076

Description :

Frozen Meat Grinder

Technical Specification :

The meat grinder relies on the screw to push the raw meat in the hopper box to the pre-cutting plate, Through the rotation of the screw, the reamer and the orifice plate move relative to each other, thereby cutting the raw meat into granular shapes and ensuring the uniformity of the meat filling. Sex.

The main body of the meat grinder is made of stainless steel, with reasonable structure stable and reliable mechanical performance and low noise. This machine can cut fresh and frozen meat.

Users can select orifice plates of different specifications according to process requirements to process ideal meat fillings to meet the processing needs of different meat products.
