

Product Name :
Commercial Dry Pasta Machine

Product Code :
MM-CHINA11003-0015

Description :

Commercial Dry Pasta Machine

Technical Specification :

The Commercial Dry Pasta Machine is engineered to meet the demands of food processing factories, pasta manufacturers, and large-scale kitchens that require efficiency, consistency, and superior quality. Designed with advanced automation, this machine streamlines the entire process of dough mixing, extrusion, cutting, and drying, ensuring uniform texture and taste in every batch.

Built with durable stainless steel and equipped with intelligent control systems, the Commercial Dry Pasta Machine guarantees food safety, hygienic operation, and long service life. It is suitable for producing a wide range of pasta types, including spaghetti, macaroni, penne, fusilli, and other customized shapes.

Key Features

High Production Capacity – Capable of continuous operation for industrial-scale output.

Advanced Drying Technology – Ensures precise temperature and humidity control to achieve perfect pasta texture and extended shelf life.

Durable Stainless Steel Construction – Corrosion-resistant, easy to clean, and compliant with international food safety standards.

User-Friendly Control System – Automated operation with programmable settings for flexibility and efficiency.

Versatile Applications – Adaptable to different pasta shapes and sizes with interchangeable molds.

Applications

The Commercial Dry Pasta Machine is widely used in:
Industrial pasta factories

Food processing plants
Large-scale catering businesses
Central kitchens and wholesale suppliers
