

Product Name :
Donut Making Machine

Product Code :
MM-CHINA11003-0029

Description :

Donut Making Machine

Technical Specification :

It has adopted electronic oil temperature control and display system. The temperature of oil in the slot will be controlled by the controller which keeps temperature system and the oil temperature display is clear at a glance.

About the automatic donut making machine, by adjusting the height of the rod, you can control the size of the circle. Rod high the circle is bigger, low lever then smaller. As for the small donut maker, the mold is flexible and it can produce donuts with nice appearance and different sizes.

The donut maker machine can fry, blank and discharge automatically. So it is easy to operate with high efficiency and stable performance.

4. Others: Wholly made of stainless steel; sanitary and low noise; low price and prospect market.
