

Product Name :
Churros Making Machine

Product Code :
MM-CHINA11003-0031

Description :

Churros Making Machine

Technical Specification :

Churros making machine is composed of churros forming machine, churros filling machine and churros gas fryer and they are all necessary to make delicious churros.

Every one has its own special function.

We can connect them to make churros step by step.

Churros making machine series are operated by manual.

This model churros machine is just a kind of churros modeling machine, so we suggest to use with an electric/gas fryer.

Adopting stainless steel as the material makes them look elegant, luxury and fashion.

It can not only make the delicious churros but also can be displayed as an art exhibit.

Churros gas fryer can be used to fry food, we introduce it here mainly for your choice to match our churros making machine. Of course, you can buy it separately.

We can supply this kind of fryer which can be heated by gas or electricity, as you require.

Churros filling machine is a small type for filling the jam, cream or chocolate into the churros, which make the fresh yellow churros become more palatable.

All these three churros making machines are made of stainless steel, easy to use and have high qualities.

Features of Churros Making Machine

Made of high-quality stainless steel, meeting the food standard and healthy.

Elegant appearance, looking elegant, luxury and fashion.

These machines are small volume and lightweight. It can not only make the delicious churros but also can be displayed as an art exhibit.

In the process of making churro, you can change the churros' shape and length at will. Simple structure, easy to operate and clean.
