

Product Name :
AF Series Flake Pellet Ice Machine

Product Code :
MM-CHINA11004-001

Description :

AF Series Flake Pellet Ice Machine

Technical Specification :

The AF Series Flake Pellet Ice Machines produce small, granular snowflake ice that excels in penetrating narrow spaces for fast and efficient cooling.

These machines are designed with advanced automation and energy-saving technologies to deliver reliable ice output with minimal maintenance.

Ideal for use in coffee shops, hotels, bars, KTV, western restaurants, beverage outlets, laboratories, and hospitals.

Fine Granular Snowflake Ice

Small-sized ice pellets that penetrate tight gaps quickly, ensuring superior cooling efficiency.

Perfect for applications requiring delicate ice that melts slowly and cools effectively.

User-Friendly Monitoring

Equipped with unique indicators for ice full, water shortage, and fault alarms, making it easy for operators to monitor machine status at a glance.

Energy Efficient & Reliable

Utilizes internationally renowned high-efficiency compressors and optimized refrigeration systems for reduced power consumption.

Microcomputer control system automates water intake, ice making, ice dropping, and features automatic recovery after power or water interruptions, allowing unattended, safe operation.
