

Product Name :
Sweet Corn Canning Production Line

Product Code :
MM-CHINA11005-002

Description :

Sweet Corn Canning Production Line

Technical Specification :

Automatic Corn Kernel Cutting System

Efficiently separates kernels from cobs with minimal damage and waste, ensuring consistent kernel size and texture.

High-Precision Filling and Seaming Machines

Automatically fills corn kernels and brine or cream mixture into cans or jars with accurate volume control.

Advanced Sterilization and Cooling System

High-temperature steam or water-spray retort ensures product safety, flavor retention, and extended shelf life.

Smart PLC Control System

Integrated control panel allows operators to monitor each stage, with automatic alarms and fault diagnosis functions.

Durable and Hygienic Design

Entirely constructed from corrosion-resistant stainless steel, easy to clean and maintain, suitable for continuous operation.
