

Product Name :
Egg Canning Production Line

Product Code :
MM-CHINA11005-003

Description :

Egg Canning Production Line

Technical Specification :

Automatic Egg Washing & Peeling System:

Efficiently cleans and peels boiled eggs without damaging the surface, ensuring uniform quality.

Precise Filling and Liquid Injection:

Automatically fills eggs and seasoning liquid (such as brine, soy sauce, or marinades) into cans or jars with high accuracy.

Vacuum Sealing & Sterilization:

Ensures airtight sealing and effective sterilization through steam or retort processes, extending shelf life while maintaining flavor and texture.

Modular Design & Flexible Layout:

The production line can be configured for different packaging materials (tin cans, glass jars, or aluminum cans) and production scales.

Compliance & Safety:

Made from food-grade stainless steel meeting FDA and EU food machinery standards.
