

Product Name :
Button Mushroom Canning Production Line

Product Code :
MM-CHINA11005-004

Description :

Button Mushroom Canning Production Line

Technical Specification :

Raw Material Sorting and Washing

Vibrating conveyor and bubble washer remove soil and impurities from fresh mushrooms.
Air bubble cleaning ensures no damage to delicate mushroom surfaces.

Grading and Cutting

Grading machine classifies mushrooms by size and quality.
Optional cutting system for sliced or diced mushroom production.

Blanching and Cooling

Steam or hot water blanching deactivates enzymes, enhances color and flavor stability.
Cooling section maintains firmness and prevents overcooking.

Filling and Vacuum Sealing

Automatic filling machine dispenses mushrooms and brine solution precisely.
Vacuum seaming system ensures airtight packaging and longer shelf life.

Sterilization and Drying

High-temperature retort sterilizer guarantees food safety and product stability.
Air drying tunnel prepares cans for labeling.
