

Product Name :
Corn Canning Production Line

Product Code :
MM-CHINA11005-006

Description :

Corn Canning Production Line

Technical Specification :

Raw Corn Husking and Cleaning

Automatic husker removes outer leaves efficiently.

Bubble washer eliminates impurities, dust, and silk.

Cutting and Kernel Removal

Sweet corn kernel cutting machine ensures uniform size and minimal waste.

Baby corn cutting units maintain product integrity and appearance.

Blanching and Cooling

Steam or hot water blanching system deactivates enzymes, preserves color and flavor.

Cooling tunnel prevents overcooking and ensures consistent texture.

Filling and Vacuum Sealing

Automatic filling machine dispenses precise portions of corn kernels and brine.

Vacuum seaming system ensures airtight packaging, extending shelf life.

Sterilization and Drying

Continuous retort sterilizer eliminates bacteria and guarantees food safety.

Air drying system prepares cans for labeling and packaging.
