

Product Name :
Meat Canned Food Production Line

Product Code :
MM-CHINA11005-007

Description :

Meat Canned Food Production Line

Technical Specification :

Raw Meat Preparation

Meat trimming, deboning, and cutting into uniform pieces.

Optional grinder or slicer system for minced or chunk-style canned meat.

Cooking and Mixing

Steam or electric cooking kettles ensure even heat treatment.

Sauce preparation and seasoning systems provide flexible recipe customization.

Can Filling and Vacuum Sealing

Automatic portion filling system for meat and gravy.

High-speed vacuum seaming machine ensures airtight sealing and oxidation prevention.

Sterilization and Cooling

High-temperature retort sterilization (121°C) for microbiological safety.

Rapid cooling tunnel prevents overcooking and maintains meat texture.
