

Product Name :
Green Bean Canned Food Production Line

Product Code :
MM-CHINA11005-008

Description :

Green Bean Canned Food Production Line

Technical Specification :

Raw Material Sorting and Washing

High-speed drum washer and bubble cleaning system remove mud and impurities.

Optical sorting machines ensure uniform color and quality selection.

Cutting and Blanching

Precision cutting equipment achieves consistent bean length.

Automatic blanching units deactivate enzymes, preserve color, and maintain texture.

Canning and Filling

Automatic can filling machines ensure accurate portioning.

Adjustable filling systems suitable for brine, sauce, or oil-based liquids.

Seaming and Sterilization

Vacuum seaming machines ensure tight sealing and prevent oxidation.

Continuous sterilizers and retort systems achieve microbial safety and product stability.
