

Product Name :
Blackfish Canning Production Line

Product Code :
MM-CHINA11005-0021

Description :

Blackfish Canning Production Line

Technical Specification :

Fully automated production for large-scale operations
High throughput with minimal labor
Ensures consistent quality and long shelf life
Energy-efficient and environmentally friendly design
Customizable for different can sizes and processing requirements
Core Processes and Equipment

The production line integrates high-performance machinery to cover the entire blackfish canning process:

Fish Pre-Processing Equipment

Automatic Cleaning and Gutting: Removes scales, heads, and internal organs efficiently.

Sorting & Cutting Machines: Ensures uniform fish sizes for consistent cooking and can filling.

Benefits:

Reduces labor costs and processing time

Maintains consistent product quality

Supports high-volume production

Production Capacity: 500–5000 cans/hour (depending on configuration)

Can Sizes: 100–500g (custom sizes available)

Automation Level: Semi-automatic / Fully automatic

Material: Food-grade stainless steel 304/316, corrosion-resistant

Optional Features: weighing, automatic cleaning, CIP systems
