

Product Name :
Sea Fish Canning

Product Code :
MM-CHINA11008-001

Description :

Sea Fish Canning

Technical Specification :

Fully automated operation for large-scale production
High-capacity throughput for industrial factories
Compliance with HACCP, ISO22000, and GMP standards
Energy-saving and environmentally friendly design
Customizable solutions to fit different production needs

Core Processes and Equipment

The Sea Fish Canning Production Line integrates multiple high-performance machines to streamline the entire canning process:

Fish Pre-Processing Equipment

Automatic Fish Cleaning System: Removes scales, gutting, and head removal efficiently.

Sorting & Cutting Machines: Prepares fish to uniform sizes for consistent cooking and can filling.

Advantages:

Reduces labor costs
Minimizes processing errors
Increases overall throughput

Can Sizes: 100–500g (custom sizes available)

Automation Level: Semi-automatic / Fully automatic

Material: Food-grade stainless steel 304/316, corrosion-resistant

Optional Features: weighing, automatic cleaning, CIP systems
