

Product Name :
Carrot Processing Line

Product Code :
MM-CHINA11005-0022

Description :

Carrot Processing Line

Technical Specification :

Elevator Conveyor: Automatically transfers raw carrots to the washing section, reducing manual handling.

Bubble Washing Machine: Uses air bubbles and water circulation to remove soil, sand, and impurities gently and thoroughly.

Brush Peeling Machine: Equipped with durable nylon brushes for uniform peeling without damaging the surface.

Sorting Conveyor: Enables visual inspection and grading before further processing.

Cutting Machine: High-speed stainless steel blades for slicing, dicing, or shredding to precise dimensions.

Blanching Machine: Stabilizes color and texture, preparing carrots for freezing or further processing.

Cooling Conveyor: Rapidly cools blanched carrots using chilled water to maintain freshness.

Dewatering & Drying Machine: Removes surface moisture before packaging.
