

Product Name :
Cake Production Line

Product Code :
MM-CHINA11005-0023

Description :

Cake Production Line

Technical Specification :

Batter Mixing System: Automatically blends flour, sugar, oil, eggs, and other ingredients for a consistent texture.

Depositing Machine: Precisely deposits batter into trays, cups, or molds with servo-driven accuracy.

Tunnel Oven: Uniform hot air circulation ensures even baking and golden crust formation.

Cooling Conveyor: Gradual cooling system preserves cake softness and prevents deformation.

Filling & Topping Machine: Optional chocolate, cream, or fruit filling station for diverse product lines.

Automatic Packaging Machine: Integrates cutting, wrapping, and labeling for final product presentation.
