

Product Name :
Hard Candy Production Line

Product Code :
MM-CHINA11005-0024

Description :

Hard Candy Production Line

Technical Specification :

Automatic Operation — From syrup preparation to final molding, all processes are PLC-controlled for consistent quality and easy operation.

High Precision Depositing System — Ensures accurate candy weight, shape, and color distribution with minimal waste.

Flexible Mold Design — Supports multiple shapes and color patterns, including two-color, center-filled, or striped candies.

Efficient Heating & Vacuum Cooking — Stainless steel steam jacketed cooker with precise temperature control maintains stable sugar concentration and crystal transparency.

Hygienic and Durable Structure — All food-contact parts are made from SUS304/316 stainless steel, compliant with CE and GMP standards.

Energy-Saving System — Optimized heat recovery and reduced steam consumption for lower operating costs.
