

Product Name :
Peanut Butter Production Line

Product Code :
MM-CHINA11005-0025

Description :

Peanut Butter Production Line

Technical Specification :

Raw Peanut Feeding

Clean peanuts are loaded into the system for automatic continuous processing.

Roasting

Peanuts are evenly roasted using hot air or rotary drum roasters to develop aroma and flavor.

Cooling & Peeling

Rapid cooling ensures crisp texture; skin is removed efficiently by air friction or roller peeling.

Grinding (Primary & Fine)

Two-stage colloid mills grind peanuts into fine paste, achieving a particle size of 50–70 microns.

Mixing & Homogenizing

Sugar, salt, oil, or stabilizers are added and mixed evenly; homogenizer ensures smooth texture.

Cooling

Paste is cooled to a stable temperature to maintain flavor and consistency.

Filling & Packaging

The finished peanut butter is filled into jars, bottles, or pouches using precise servo-driven fillers.
