

Product Name :
Food Fluidized Bed

Product Code :
EQUP-MC20077-0010

Description :

Food Fluidized Bed

Technical Specification :

- 1,Vibration fluidized bed dryer by vibration motor, smooth running, low noise, long life, easy maintenance.
- 2, High thermal efficiency, saving over 30% than the average drying device. The bed temperature distribution uniform, no local overheating uniform fluidization, no dead ends phenomenon.
- 3,Material thickness, and the machine speed and amplitude uniform design within stepless adjustment, tunability applicable wide.
- 4,On the surface of the material damage is small, can be used for drying of fragile materials, irregular material particles can also be used, to no effect.
- 5,Vibration fluidized bed dryer using a fully enclosed structure, effectively prevent the material with the outside world to cross-contamination, clean environment, continuous operation

Bed body		Shape			Vibration motor power?kw?	weight?kg?
