

Product Name :
Mango Pineapple Juice Processing Plant

Product Code :
EQUP-MC20089-0018

Description :

Mango Pineapple Juice Processing Plant

Technical Specification :

High quality products and services have positioned us as the Chinese market leader in mango/pineapple juice processing equipment. Since China ranks the biggest concentrated mango/pineapple juice producer in the worldwide market, We have created a mango/pineapple processing segment that provides all of the necessary processing machinery for achieving quality products at controlled cost.

Our fruit reception lines are designed to satisfy the most rigorous standards of hygiene in cleaning the raw material. Then highly sophisticated mills ensure optimized mash preparation. Featuring a unique drainage system, the Belt Press with an optimizing control system gives a maximum yield of top quality juices with very low sediment content.

Equipped with ultrafiltration system, membrane filtration systems produce clear and stable juices. Adsorption and ion exchange systems allow further purification of liquid foods, while Our multistage vacuum evaporators come with sterilization and aseptic filling unit. To assure outstanding ease and reliability of operation, we also provide an electronic monitoring and control system. And to round off the range of high-tech machines, we offer comprehensive engineering services, installation supervision, commissioning support and operator training.

Raw material	Fresh mango
End product	Concentrated juice, clear juice
Processing capacity	From 60tons/day to 2000 tons/day
Efficient input	75% raw fruit (25% as waste,peels and seeds)
Fruit consistence	10-12Brix
Product consistence	70~72Brix for concentrated juice
End package	Aseptic bag/tin can/glass bottle/PET bottle
Output	Can be calculated
