The jug ought to be set in a transport support of Automatic Top/Bottom Applicator, and after that sent by driven roller, passing a transport support. The name is appropriated from the stacking compartment. With the assistance of this machine labels are connected on the jugs without making any wrinkles. Since sponsorship paper of such stickers are waste materials that should be disposed of, so they will be taken away to dispose of by an alternate reel after the whole procedure is done. Label position on the items is essential and it ought to be steady and exact.

Depends on Container size, fill size, Neck diameter of container, nature of liquid & operator etc.
We can supply as per customer requirements.
With help of change parts.
