

Product Name :
Packing Capping Machine for Water

Product Code :
EQUP-MC20085-0037

Description :

Packing Capping Machine for Water

Technical Specification :

Typically, three or four arrangements of plates will be utilized to bit by bit fix tops. Lifts or vibratory dishes help these constant topping machines by conveying tops to every individual jug, leaving the administrator of the machine to just supplant mass tops as required. These topping machines can deal with an extensive variety of screw sort tops, including level tops, sports tops, trigger sprayers and some more. The adaptability and simplicity of operation are two variables that make this topping machine well known.

Output/Hour*	1000 to 2400 Containers
No. of sealing head	1 Nos.
Electrical Motor**	1 H.P. , 415 Volts, 3 Phase For Main Machine
Change parts required	Cap Die if cap diameter change.

Feature:

- Depends on bottle size, cap size and type of cap.
- We can supply as per customer requirements.
